**Primary Business Type:** \_\_\_\_\_

CCWRD reserves the right, but is not required to, conduct physical inspections of all commercial structures upon completion of construction for the purposes of verifying actual billing units (ERUs). If the number of ERUs/billing units found during inspection differs from those counted and paid for from the plans, an adjustment in system development charges may be made. If additional ERUs are found, SDA charges (sewer connection fees) will be due and payable and shall be paid at the rate in effect at the date of discovery by CCWRD. Additionally, CCWRD may periodically, but is not required to, inspect the premises for any changes of the type of business conducted, quality of wastewater discharged, and to determine the number of billing units/ERUs. All additional ERUs shall be billed to the legal owner of the property.
