Stay Manhole Safe!

Tampering with or removing a sanitary sewer manhole cover is dangerous and illegal. An open sanitary sewer manhole can be dangerous in the following ways:

- People and animals can fall into open manholes.
- Unintended objects or liquids in manholes are difficult to remove and can be harmful to the environment.
- Manhole covers can be deadly if projected by a vehicle towards a pedestrian, cyclists, or other motorists.
- Gasses emitted from manholes may be flammable or explosive.
- Securing a sanitary sewer manhole cover requires specialized training and equipment.

Remember: Intentionally pouring, dumping, or placing anything into an open sanitary sewer manhole is illegal.
